# Give Teams a Voice with OneStream Networks

Many businesses utilizing Microsoft Teams for internal collaboration can now benefit from the ability to make and receive calls by enabling Teams as a full cloud-based UC solution with enterprise grade telephony.

Give your Teams a voice with confidence - benefit from a highly reliable, resilient architecture with Direct Routing from OneStream Networks, with simple provisioning, enhanced call control features and carrier grade infrastructure.

**All provided at a competitive price,  
as a complete cloud solution.**

## Give Microsoft Teams a Voice

Enable full native voice capability globally to 80 countries into Microsoft Teams, as an alternative to Microsoft calling plans and without the need for on-premise hardware.

Teams - Direct Routing utilizes OneStream Networks' Microsoft Certified Session Border Controllers(SBCs), to deliver better value, greater flexibility, increased functionality and support for migration, all as a cloud-based service.

Teams - Direct Routing provides connectivity to your Microsoft Team's tenant enabling full PSTN breakout on the public telephone network. Connection from Microsoft Teams to our network is via a secured IP connection and is delivered as an end-to-end service with high availability.

### What is required to enable Teams - Direct Routing?

The following components are required:

- Microsoft 365 or Office 365 license including Teams
- Microsoft Phone System add-on
- An internet connection
